ABOUT ME

This is Muhammad Wasif Raza, the Seventeen years old Founder & CEO of VirtueVision and a motivated Aspiring Full Stack Developer with hands on practice with real world projects. Building modern web applications using Mongo DB, Express.js, Node.js, React.js, Tailwind css and vite. Also have specialized in the deployment tools and version control (Git, GitHub) and Vercel, Render, Railway, Firebase, Supabase. Also mastery in Vanilla JavaScript, Authentication, Authorization and JWT.

EXPERIENCE

Front-End Developer & Founder

2025 (May-Dec)

VirtueVision Company

I started the development of vision in 2025, the vision of building a company that can offer best digital services. First, I was starting organizing the documents by searching over the Google, YouTube and other platforms. Then I started learning web development and learnt HTML & CSS in the first month and made more 10+ projects. Then in the second month I started learning the fundamentals of JavaScript. Third month, I learnt modern frameworks like Tailwind css and React js with vite. Then in the fourth month, I started the development of main VirtueVision website and successfully launched website in the November. (virtue-vision.com). Also, I made some practice projects and mini games that deployed on GitHub (github.io/wasif-virtue).

Back-End Developer & CTO

GrowWeb IT Company

2026 (Jan - Now)

In 2025, I had developed and launched the my own company VirtueVision Website. Then in the starting 4 months, I studied my Matriculation academics and prepared for my exams. After taking all the exans, without wasting anytime, I again started to improve my technical foundations. On May, I revised my Frontend Development technologies and started to learn Backend Development and finally in the month of June when I had the confidence over my Backend skills. I realized that I don't know how to scale my web development company and not got any clients projects.. Then I created my LinkedIn account and started making connections with other developers and Founders. Then I decided to get an internship and get a job of Cheif Technology Officer at GrowWeb IT Company. (growweb.website).
